ASCENT DR-TB Project goals

- Support introduction of new shorter treatment regimen for DR-TB and differentiated supportive people centred packages of care;
- Facilitate sharing of experiences and best practices between stakeholders at global, regional, and project countries to accelerate implementation and scale up of new shorter regimens
- Support community demand generation, access to comprehensive treatment package including patients' treatment literacy, socioeconomic support, etc.
- To contribute to securing a global affordable market for key diagnostics, drugs and secure appropriate equitable access conditions for TB health technology products.

THANK YOU!
СПАСИБО!
